

## Utilization of Medicinal Plants for the People of Indonesia

as a means of improving **the nutrition** of the Indonesian people, because many medicinal plants produce fruits and vegetables that will later add nutrition to the community's body

as a means of driving the **reforestation program**, by planting medicinal plants with types of trees such as amarind trees, and many others,

as a means of **preserving nature**, by planting medicinal plants making medicinal plants continue to exist and not experience extinction,

as a means of **beauty**, neat and orderly layout in planting medicinal plants will make beautiful results to look at and make many people interested in participating in planting medicinal plants
